Overview

Almost there!

Welcome to your Business Manager Portal. We just need a few details to get your business up and running.

Verify your information, set up your services, staff, bookings, and invoices — once that’s done, your mobile app will be ready to go!

Follow the checklist to complete your Business Setup. Once all steps are done, your business will be activated.

Add a Site

A **Site** is the physical location where your business operates. Every **Trade Unit** must be linked to a Site.

- By default, your **registered business address** is automatically added as your first Site.
- If your Trade Unit operates from this same address, **you do not need to add another Site**.
- Only if a Trade Unit operates from a **different address** (for example, another branch, workshop, or office) will you need to **add that Site first**.
- Once the Site is created and verified, you can then link a Trade Unit to it.

This setup ensures each **Trade Unit** is tied to the correct location, making it easier to manage businesses with multiple premises.

How to Add a New Site

Please follow these steps **only if you need to add a Site**:

1. Go to **Business > Sites** in the main menu.
2. Click **Add**.
3. Provide the **address details** for this location.
4. Upload **all required proof documents** (e.g., utility bill, lease agreement, or business rates document).
5. Save your changes.

Tip: You can keep track of verification status by going to the **Verifications** section. All required proof must be provided when adding a Site, but the Verifications section lets you monitor progress and updates in one place.

Once the Site is **verified**, it is ready to use, and you can proceed to add a Trade Unit and link it to this Site.

Overview

Almost there!

Welcome to your Business Manager Portal. We just need a few details to get your business up and running.

Verify your information, set up your services, staff, bookings, and invoices — once that’s done, your mobile app will be ready to go!

Follow the checklist to complete your Business Setup. Once all steps are done, your business will be activated.

Add a Site

Add a Bank Account for Payouts

Payout Account

Your **Payout Account** is the bank account where **refunds and payouts from the platform** will be sent.

To set up a Payout Account, first, you need to add a bank account and have it verified.

Adding a Bank Account for Payouts

- The bank account must belong to your **registered business** or be in the **trading name** associated with your business.
- You **will be asked to upload supporting documents** (such as a recent bank statement)
- You can add **multiple bank accounts**. Each account can be given a **label** (for example, “Main Account” or “Savings Account”) to help you identify them. There is no default account — you choose which one to use when setting up payouts.

How to Add a Bank Account

Please follow these steps to add a new account:

1. Go to **Business > Bank Accounts** in the main menu.
2. Click **Add**.
3. Enter your account holder name, sort code, and account number.
4. Add a label to help you recognise this account.
5. Upload any **required supporting documentation** to verify the account (e.g., bank statement or account confirmation letter).
6. Save your changes.

Once saved, you can **keep track of verification status** by going to the **Verifications** section, which allows you to monitor all pending and completed verifications in one place. Verification is **required** before the account can be used as a payout account. Once verified, go to **Billings & Payments > Payout Account** to link the bank account for refunds and payouts.

Add a Site

Add a Bank Account for Payouts

Upload Proof Documentation for Verification

Certain actions in the platform require **verification**. This includes **adding a Site, adding a Bank Account for Payouts, and verifying your business**. Uploading proof documents is **mandatory** to make your account **LIVE**.

- **Business Verification:** Documents to confirm your business registration and identity, such as a **certificate of incorporation, business registration certificate, or official government-issued documents**.
- **Sites:** Documents such as a **utility bill, lease agreement, or business rates notice** to confirm the address.
- **Bank Accounts:** A **recent bank statement** or other document showing the account belongs to your business.
- The system will **automatically list all required documents based** on the information you provided during registration, and when adding **Sites** or **Bank Accounts**.
- Each document you upload will be **reviewed by the platform** to ensure it meets verification requirements.

How to Upload Proof Documents

1. Go to **Business > Verification Documents** in the main menu.
 2. You will see a list of **all required documents** according to your registration and added Sites/Bank Accounts.
 3. Click **Upload Document** next to each required item.
 4. Choose the relevant file from your device.
 5. Save your changes.
- Once uploaded, the documents will be **reviewed**.
- After all verifications are **approved**, your business, Sites, and Bank Accounts will be ready to use, and your account will be **LIVE**.

Add a Paying Account

Adding a Payout Account

Your **Payout Account** is the bank account where **refunds and payouts from the platform** will be sent.

Precondition: Only a **verified bank account** can be linked as a Payout Account.

Once your bank account is verified, you can link it as your Payout Account.

How to Link a Verified Bank Account as Payout Account

1. Go to **Billing & Payments > Payout Account** in the main menu.
2. Click **Edit**.
3. Select one of your **verified bank accounts** from the list.
4. Save your changes.

Your selected bank account is now set as your **Payout Account** and will be used for all platform payouts and refunds.

Tip: If your bank account is not yet verified, it **will not appear** in the list of accounts to link. Make sure to complete bank account verification first.

Add Trading Names

Adding a Trading Name

A **Trading Name** is an alternative name your business operates under, different from your registered business name. Adding trading names helps customers and partners recognize your business if it is known by multiple names.

- You can have **multiple trading names** for your business.
- Each trading name is linked to your **registered business** and appears in the system for identification and reporting purposes.
- Trading names **appear in the Marketplace** and **on invoices**, so customers will see the name you choose here.
- Adding a trading name does **not** require a separate address or bank account — it is just a name associated with your business.
- **Important:** When adding a Trade Unit, you will need to **link a trading name** if your business has any.

How to Add a Trading Name

1. Go to **Business > Trading Names** in the main menu.
2. Click **Add Trading Name**.
3. Enter the **Trading Name** you want to add.
4. Save your changes.

✔ Your trading name is now linked to your business and will appear in the Marketplace, on invoices, and in other relevant sections of the platform.

✔ It will also be available to **link when adding Trade Units**, if your business has multiple trading names.

Add Trading Names

Add a Trade Unit

Adding a Trade Unit

The Trade Unit is the core operational and customer-facing entity of your business in the platform. It represents a specific branch, workshop, or service outlet. All other elements—such as Sites, Trading Names, and email addresses—are linked to it. Trade Units help manage operations, reporting, and Marketplace presence, as this is what your customers interact with.

- A Trade Unit must be linked to a Site.
 - If the Trade Unit operates at your registered business address, the default Site can be used.
 - If it operates at a different address, you must add that Site first.
- If your business has one or more Trading Names, you will need to link the appropriate Trading Name to the Trade Unit.
- Trade Units appear in the Marketplace and are used for operational and reporting purposes.

How to Add a Trade Unit

1. Go to **Products > Service Provider > Trade Units** in the main menu.
 2. Click **Add**.
 3. Enter the relevant details for the Trade Unit (such as name, Site, and Trading Name if applicable).
 4. Save your changes.
-  The Trade Unit is now the **core entity** your customers will interact with. It will appear in the system for operations, reporting, and Marketplace listings.

Follow the checklist to complete your Business Setup. Once all steps are done, your business will be activated.

Add Trading Names

Add a Trade Unit

Set Booking Times

Booking Times configure the diary for each Trade Unit in the Service Provider app. They define the time slots available for scheduling work, helping you structure and manage your day efficiently. When setting up Booking Times, you will define:

- **Booking Start Time** – the earliest slot in the diary.
- **Booking Time Intervals** – the spacing of diary slots (e.g., every 15, 30, or 60 minutes).
- **Booking End Time** – the last slot available in the diary.

How to Set Booking Times

1. Go to **Products > Service Provider > Trade Units** in the main menu.
2. Select the **Trade Unit** you want to configure.
3. Select **App settings**.
4. Select **Booking Times** option.
5. Click **Edit**.
6. Enter the **Start Time, Intervals, and End Time** that reflect your working hours.
7. Save your changes.

- The diary for that Trade Unit is now structured around your chosen Booking Times.
- All scheduling within the Service Provider app will follow these defined slots.

Add Workstreams

Getting Started

Overview

Overview

Almost there!

Welcome to your Business Manager Portal. We just need a few details to get your business up and running.

Verify your information, set up your services, staff, bookings, and invoices — once that’s done, your mobile app will be ready to go!

Follow the checklist to complete your Business Setup. Once all steps are done, your business will be activated.

Add Workstreams

Workstreams are essential for organising jobs within a Trade Unit. They represent the categories or channels of work that can be booked into the diary.

- At least **one Workstream must be created** for each Trade Unit, since a Workstream must be selected when adding a booking.
- Workstreams can be set up in a way that suits your business — for example:
 - By **service type** (MOT, Repairs, Servicing, Diagnostics).
 - By **technician** (e.g., naming a Workstream after a mechanic).
- This flexibility allows garages to structure their diary and job management in the way that works best for them.

How to Add a Workstream

1. Go to **Products > Service Provider > Trade Units** in the main menu.
2. Select the **Trade Unit** you want to configure.
3. Open **App Settings**.
4. Select **Workstreams**.
5. Click **Add** and enter the **name and details**.
6. Save your changes.

- ✓ The new Workstream will now be available in the diary for scheduling bookings.
- ✓ Multiple Workstreams can be created per Trade Unit, giving you full flexibility in how you organise work.

Tip: Naming Workstreams

When naming Workstreams, keep the names short and easy to recognise in the diary. For example:

- Use **service types** (MOT, Servicing, Repairs) if you want to categorise jobs by type.
- Use **technician names** if you want to allocate jobs directly to staff.
- If you have **multiple technicians performing the same service**, create separate Workstreams for each. Examples:
 - “MOT – Technician 1 Name” and “MOT – Technician 2 Name”
 - “Repairs – Technician 1 Name” and “Repairs – Technician 2 Name”

Clear naming makes scheduling and managing bookings simpler for everyone in your team.

Overview

Overview

Almost there!

Welcome to your Business Manager Portal. We just need a few details to get your business up and running.

Verify your information, set up your services, staff, bookings, and invoices — once that’s done, your mobile app will be ready to go!

Follow the checklist to complete your Business Setup. Once all steps are done, your business will be activated.

Add Email Address

Email addresses are used **purely for linking purposes** in the platform. They are currently required for **Invoice Document Settings** to ensure invoices display correct contact details for remittance.

- **Garage Email Address** – The primary email for the garage, entered in the Garage Details section (name, address, etc).
- **Remittance Email** – Used if the garage accepts payments by bank transfer, so customers know where to send remittance information.
- **Optional** – If you do not want your email address on invoice documents for contact purposes, or do not need a remittance email address, you can **skip this section**.

How to Add an Email Address

1. Go to **Business > Email Addresses** in the main menu.
2. Click **Add**.
3. Enter the **email address** you want to link.
4. Save your changes.

Once added, the email address can be linked in **Invoice Document Settings**.

You can add multiple email addresses as needed for different purposes, such as remittance or other invoice contacts.

Tip: Linking Email Addresses for Invoices

- If you have **one email address** for both the garage contact and remittance, simply add **one email address** and link it from the relevant invoice settings.
- If you have **two separate email addresses** (one for general garage contact, one for remittance), add **both email addresses** and link each to its corresponding invoice setting.

This ensures invoices always display the correct email address for each purpose.

Overview

Overview

Almost there!

Welcome to your Business Manager Portal. We just need a few details to get your business up and running.

Verify your information, set up your services, staff, bookings, and invoices — once that’s done, your mobile app will be ready to go!

Follow the checklist to complete your Business Setup. Once all steps are done, your business will be activated.

Set Invoice Document

Invoice Document Settings allow you to configure how invoices appear and what business and contact information is displayed. Each invoice is **linked to a specific Trade Unit**, so the correct details are shown for that location.

Note: Configuring Invoice Document Settings is **mandatory** for the Service Provider app. You cannot proceed without completing this step.

- **Business Name Format** – How your business name will appear on invoices.
- **Site Address** – Used for contact purposes on the invoice.
- **Other Contact Details** – Includes phone number, email address, and any other relevant contact information.
- **Optional Bank Transfer Details** – If the garage accepts bank transfers, you can link a verified bank account, so remittance details appear on the invoice.

How to Configure Invoice Document Settings

1. Go to **Products > Service Provider > Trade Units** in the main menu.
 2. Select the **Trade Unit** you want to configure.
 3. Open **App Settings**.
 4. Select **Invoice Document Settings**.
 5. Configure the **Business Name Format** as you want it to appear on invoices.
 6. Enter the **Site Address** for contact purposes.
 7. Add **other contact details**, including a **contact Email Address** if desired.
 8. If accepting bank transfers, link the **verified bank account** to display remittance information.
 9. Save your changes.
- ✓ Invoices for this Trade Unit will now display the correct business, site, and contact information.
 - ✓ Any linked verified bank account will provide customers with the correct remittance details.
 - ✓ Settings can be updated at any time to reflect changes in business or contact information.

Tip: Linking Bank and Email Details

- Ensure that the **contact email** is active and monitored.
- Only link **verified bank accounts** for remittance purposes.
- If using one email address for both contact and remittance, link it in both fields; otherwise, link separate addresses appropriately.

Overview

Almost there!

Welcome to your Business Manager Portal. We just need a few details to get your business up and running.

Verify your information, set up your services, staff, bookings, and invoices — once that’s done, your mobile app will be ready to go!

Follow the checklist to complete your Business Setup. Once all steps are done, your business will be activated.

Add a User

All user management is handled from the **Directory**, a **standalone main menu section**. This is where you create, update, link, and control access for all users across your platform.

- When adding a user, you **first assign them to one or more apps** (e.g., Business Manager app, Service Provider app).
- Roles and permissions are **app-specific**, meaning a user may have different access levels in each product.
- **Default roles and permissions** are pre-configured to cover the most common scenarios and **cannot be edited**.
- **Custom roles and permissions** can be added for advanced users who require tailored access.
- **Linking a user to Trade Units** is **specific to the Service Provider app**, so only Service Provider users need to be associated with Trade Units.
- Multiple users can be added across apps and Trade Units as needed.
- From the Directory, you can **edit, deactivate, or remove users** at any time.

How to Add a User

1. Go to **Directory > Users** in the main menu.
 2. Click **Add**.
 3. Enter the **relevant details** (name, email, etc.).
 4. **Assign the user to one or more apps.**
 5. For each app, assign **default or custom roles/permissions** according to their responsibilities.
 6. If assigning the user to the **Service Provider app**, link them to **one or more Trade Units** as needed.
 7. Save your changes.
- The user will now have access to the selected apps according to the roles and permissions assigned.
- Users can be updated, deactivated, or removed entirely from this section.

Overview

Almost there!

Welcome to your Business Manager Portal. We just need a few details to get your business up and running.

Verify your information, set up your services, staff, bookings, and invoices — once that’s done, your mobile app will be ready to go!

Follow the checklist to complete your Business Setup. Once all steps are done, your business will be activated.

Tip: Managing Users Across Apps and Trade Units

- Default roles cover most common scenarios and **cannot be edited**.
- Only create **custom roles** if advanced or specific access is required.
- Only give **Admin access** in any app to trusted personnel.
- Assign **Manager or Staff roles** according to what the user needs to do in each app.
- Ensure each user has a **unique and monitored email address** for login and notifications.
- Linking users to multiple Trade Units applies **only for Service Provider users**, giving flexibility for staff covering several locations.
- All user management—adding, updating, linking, and removing—is **fully controlled from the Directory > Users** section.

Example Scenario: Service Provider App with One Trade Unit

Suppose a garage has **one Trade Unit**. Using the **pre-configured default roles**, the following users are added:

User	App Access	Role (Default)	Trade Unit Access	Permissions Summary
Owner	Service Provider App	Admin	Linked to Trade Unit 1	Full access to all settings, workstreams, diary, invoices.
Manager	Service Provider App	Manager	Linked to Trade Unit 1	Can manage bookings, workstreams, and the diary; cannot change app-level settings.
Technician	Service Provider App	Staff	Linked to Trade Unit 1	Can view and update jobs in the diary; mark work as completed.

Each user is linked to the **same Trade Unit**, ensuring they can access relevant jobs and bookings.

- ✓ **Default roles** cover the most common operational needs and **cannot be edited**.
- ✓ Roles define **who can configure the system vs. who can operate it day-to-day**, maintaining security and clarity.

Optional: For advanced users with specialized responsibilities, **custom roles** can be created with tailored permissions, but this is only recommended for experienced administrators.

Proof of business registration (?)

1 document according to your business setup:

Limited Company (Ltd) / Limited Liability Partnership (LLP)

- No additional documents required - Companies House registration number is sufficient and can be verified by the platform.

Sole Trader / Self-Employed

- **Existing (with tax history):**
HMRC Self Assessment (SA302) or VAT Registration Certificate
- **New / No Tax Return Yet:**
HMRC registration confirmation or Bank Account opening confirmation or Business Insurance Certificate (current policy period)

General Partnership

- Partnership Agreement or HMRC Partnership Tax Return

Proof of trading activity (?)

1 document demonstrating your business is actively trading.

Acceptable documents:

- Recent invoice or receipt (last 6 months)
- Bank statement showing business transactions (last 6 months)
- Business insurance certificate confirming active operations (current policy period)
- Other official trading documents, if applicable

Business > Main Contacts > Main Contact > Edit Main Contact

Edit Main Contact

Help information:

Role / position (?)

Select the main contact’s official role in the business. This determines their authority to act on behalf of the business.

Proof of Id (?)

Upload a valid photo ID to verify the main contact’s identity. Accepted documents include passport, driving licence, or national ID card. This is mandatory for all main contacts.

Proof of Authorisation (?)

Required only if the main contact is not automatically authorised (e.g., a CEO who is not listed as a Director or Owner). Accepted documents include a board resolution or formal authorisation letter **confirming the person can act on behalf of the business.**

Verification Statuses

- **To Do** – Added but no proof documents uploaded yet.
- **Pending** – Proofs uploaded; awaiting verification review.
- **Verified** – Proofs approved; contact is active.
- **Rejected** – Proofs rejected; cannot act as main contact.
- **Inactive** – Previously verified contact; replaced automatically by a new verified main contact.
- **Cancelled** – User cancelled a contact in To Do or Pending; allows adding a new contact (not applicable for first main contact).

Rules for Adding a Main Contact

1. First Main Contact (Initial Registration)

1. Is added during registration.
2. Cannot be cancelled by the user.
3. Must complete verification to become the active main contact.

2. Subsequent Contacts

1. Only **one active verification at a time**.
2. Cannot add a new contact if there is a contact in **To Do** or **Pending**.
3. Can add a new contact if the current contact is **Verified**, **Rejected**, **Inactive**, or **Cancelled**.
4. Once a new contact is verified, the current verified contact automatically becomes **Inactive**.

3. Always maintain one active main contact

1. Verified contacts cannot be manually cancelled or set inactive.

 Bank Accounts

Add and manage your business bank accounts here. These will be linked in other sections such as invoice document settings and payout account selection. Multiple accounts can be stored for different purposes (e.g. main business account, remittance, trade unit specific account, etc).

At least 1 bank account needs to be added for the Payout Account.

New Bank Account

Help information:

Label (?) *

Give this account a short name so you can recognise it later when selecting for invoices or payouts. For example: Main Business Account, Refunds Account, Payout Account, or Site A – Payments.

Proof of bank account (?) *

Even if your bank account matches your registered business or trading name, we still require proof to confirm the account belongs to your business. This keeps payouts secure and ensures compliance with UK regulations.

Upload a document that clearly shows your business name, sort code, and account number. Accepted documents include:

- Recent bank statement (within 3 months)
- Void cheque or paying-in slip
- Official letter from your bank

Screenshots from online banking are acceptable if they clearly show these details.

Proof of business registration (?)

Sole Trader / Self-Employed
(Existing): HMRC Self Assessment (SA302) or VAT Registration Certificate

Sole Trader / Self-Employed
(New / No Tax Return Yet): HMRC registration confirmation or Bank Account opening confirmation or Business Insurance Certificate

General Partnership: Partnership Agreement or HMRC Partnership Tax Return

Proof of business address / activity (?)

Limited Company (Ltd) / Limited Liability Partnership (LLP): One document showing business activity/address - Bank Statement, Utility Bill, HMRC letter, Invoice.

Sole Trader / Self-Employed
(Existing): One document showing trading name & address - Bank Statement, Utility Bill, Lease, Invoice

Sole Trader / Self-Employed
(New / No Tax Return Yet): One document showing trading name & address: Bank Statement, Utility Bill, Lease, Invoice

General Partnership: One document showing partnership name & address: Bank Statement, Utility Bill, Lease, Invoice

Proof of main contact (?)

General Partnership: Partnership Agreement or Authorisation letter

Proof of site (?)
One document showing business name and site address: Bank Statement, Utility Bill, Lease, Business Rates Bill, Invoice, HMRC letter, Insurance Certificate

Site under Individual Name (Director / Partner / Owner): One document showing site address in individual’s name (Utility Bill, Lease, Bank Statement, Mortgage Statement, Official Correspondence), **and** one document linking individual to business: Companies House officer check, Partnership Agreement, Board Resolution, Sole Trader HMRC registration

Proof of bank account (?)
Even if your bank account matches your registered business or trading name, we still require proof to confirm the account belongs to your business. This keeps payouts secure and ensures compliance with UK regulations.

Limited Company (Ltd) / Limited Liability Partnership (LLP): One document showing account name & number: Bank Statement, Bank Letter, Void Cheque

Sole Trader / Self-Employed: One document showing account name & number: Bank Statement, Bank Letter, or Account Opening Confirmation for new accounts

General Partnership: One document showing account name & number; if under partner’s personal name, also provide proof linking partner to business (i.e. Partnership Agreement **or** Authorisation letter)

Even if your bank account matches your registered business or trading name, we still require proof to confirm the account belongs to your business. This keeps payouts secure and ensures compliance with UK regulations.

Upload a document that clearly shows your business name, sort code, and account number. Accepted documents include:

- Recent bank statement (within 3 months)
- Void cheque or paying-in slip
- Official letter from your bank

Screenshots from online banking are acceptable if they clearly show these details.
